

MOBILE TROMMEL SCREEN
PRONAR MPB 20.55

MOBILE TROMMEL SCREEN PRONAR MPB 20.55

- Designed for mid-size and big installations
- Great price-performance ratio
- Low fuel consumption
- Up to 6 fractions in one pass
- Fit drums from competitors
- Starscreen available

Mobile trommel screen Pronar MPB 20.55 is a machine designed for screening municipal waste, wood waste and chips, compost, biomass, coal, soil, gravel, aggregates etc. Maintaining a great balance between performance, fuel consumption and price makes it an obvious choice for large installations and is extremely beneficial for wallet. Well thought-out design means that daily operation or maintenance are simple and intuitive operations. Thanks to the extensive list of additional equipment, it is possible to configure the machine in a way that allows the distribution of input material into as many as 6 fractions. Drum compatibility with competition products is an undoubted plus, which will especially be appreciated by owners of large rental fleets, as well as customers who already have different drums. Starscreen, which gives unparallel control over fractions size, is available.

PARAMETERS	
Screening unit	
Trommel dimensions (length/diameter) [mm]	5500/2000
Effective sieve surface [m ²]	29,8
In-feed hopper dimensions (length/width) [mm]	3900/2230
Loading height [mm]	2850
In-feed hopper capacity [m ³]	6
Exterior side conveyor dimensions (length/width) [mm]	4900/1000
Exterior rear conveyor dimensions (length/width) [mm]	4900/1000
Drum	
Perforation size	upon customer wish
Perforation shape	upon customer wish
Mesh drum	available
Drum speed [rpm]	0-24
Overall dimensions	
Chassis	wheeled
Length [mm]	12000
Width [mm]	2550
Height [mm]	3900
Total weight [kg]	16000
Engine	
Manufacturer	CAT/Deutz/ABB
Emissions standards	Stage 3B/Stage IV/Stage V
Fuel tank [l]	320
